

PHILADELPHIA GAY NEWS

“Even if viewers did not attend high school in Albuquerque in the 1970s and 1980s, they will identify with the dozen-plus lesbians in trans filmmaker StormMiguel Florez’s wonderful documentary, “The Whistle.” The whistle of the title refers to the way lesbians (and some gay men) identified each other secretly, and the participants in this film fondly recall where they learned it as well as how they became aware of their sexuality. The community building shared by these women is empowering, as are the stories of a teacher who made a difference in their lives. There are affectionate recollections of sneaking into bars, but also somber discussions of fear and hate and rejection from families and the church. “The Whistle” is a touching and inspiring documentary.”
